Subject: RE: Next Facilitated Meeting-

Good Morning Anthony,

May 25 tech call with DNR EPA and Tribe:

It is our understanding that this call is on well placements and facilitated by the Indian Office. An agenda and list of participants is needed for this. It is also our understanding that the well locations proposed to WDNr as jointly agreed by EPA and the Tribe. Should there be shortfalls in the proposed scope of work, EPA will pursue backfilling the unmet monitoring well network need.

Update: I spoke with the WDNr hydrogeologist assigned to the project, Chris Saari, on May 10th shortly after our telephone visit. Chris was explained model errors were the hangup to release and the Tribe was pursuing possible ways to correct the errors in the quickest way possible. Chris quickly understood and offered that his understanding of federal contracting was that correcting model would likely take considerable time. He had planned on reviewing the well locations without the model the following week. He also had no interest in using an errored or misrepresented model for well placement review.

Also, Bob Kaplan contacted President Wildcat last week regarding model release. President Wildcat had returned a message last Thursday, but Mr. Kaplan was not available.

Proposed Continued Facilitation – EPA-Tribe Facilitated Meeting

This meeting continues the facilitated process and updates the facilitated agreements made in February and March. This doesn't need to occur prior to the May 25th meeting, but is needed soon.

Good morning, Kristen. A quick question, before I take this proposal to LCD: Are you thinking to have this meeting with EPA before 25 May, to prepare for the technical meeting with WDNR? Or can we address many of these longer-term items a little later? Let me know, and I get some dates and times from LCD.

Vr,

Anthony Greenwater, Director

Tribal and International Affairs
